

PAUL MCCAFFERTY

Software Engineer

PROFILE

A curious and driven software engineer focused on building effective, optimized, user-friendly solutions. I value clean code, efficient development, continuous learning, and strong collaboration.

With experience in application development, advanced coding practices, and troubleshooting, I bring a practical, problem-solving mindset to every project.

EDUCATION

Bachelor of Science in Computer Science

Central Washington University
June 2018 – November 2020
GPA – 3.38

WORK EXPERIENCE

Central Washington University, CS Teaching Assistant

January – March 2020; September – November 2020

- Providing insightful feedback in and out of class.

Function App LLC, Co-Founder

December 2019 – January 2023

- Developing the mobile application from scratch using JavaScript, React Native, Expo and Firebase.
- Focusing on modularity and long-term growth of the app to support an expansive userbase.
- Keeping up to date on modern React Native practices to provide quality user experience.
- Leading a small team in the development process.
- Working closely with business partners to establish goals, design, and structural stability of the app.
- Handling update and patch releases to both the Google Play Store and the Apple App Store.

SMART Technologies, Software Engineer

August 2020 – Present

- Working closely with a team and managers to create a user-friendly SMART Whiteboard experience.
- Complete stories and close bugs while working remotely.
- Android full stack development: C++ on the back, bridge through Java, Kotlin on the front.

SKILLS
